MADE FOR HOW AND WHERE YOU WORK.

Site Preparation
Crop Expansion
Railroad Maintenance

Vegetation Management
Wildfire Protection
Erosion Control

We built your Cat Compact Track Loader for tight maneuvers, heavy hauling, tough terrain and long hours. But we know your work isn't just hard work – it's specific. That's why we're offering our 299D XHP Compact Track Loader, factory outfitted with the Cat Land Management Package.

LAND MANAGEMENT PACKAGE INCLUDES:

CAT 299D XHP COMPACT TRACK LOADER

VISIBILITY:

Operations are not only safer, but also more productive with improved sight lines and a rearview camera.

COMFORT: Our one-piece, modular cab design is sealed and pressurized for a quiet work environment. We've installed a high-back, heated, air ride seat to reduce operator fatigue, as well as seat-mounted joystick controls.

POWER: We've increased the efficiency of your work with 94.75 hydraulic horsepower — improving your attachment's ability to maneuver through thick vegetation and harsh terrain.

SUPERIOR COOLING PACKAGE

Protect your machine from high debris environments and extreme temperatures.

GUARDING PACKAGE

Protect your machine from damage to major components and systems, as well as minimize debris accumulation.

MULCHER

Reduce vegetation, brush and trees with a 203 mm (8 in.) diameter or less into a fine byproduct. Create an even finer byproduct when you close the hydraulic door.

ADDITIONAL ATTACHMENTS AND PARTS TO IMPROVE YOUR VERSATILITY IN LAND MANAGEMENT APPLICATIONS.

The Cat attachment lineup was engineered to equip your Cat machine for many tasks. And we promise they're built to maximize machine performance.

We back our attachments with expert dealer support and an Equipment Protection Plan (EPP). Our EPP offers 36 months of protection, depending on your machine model. It's another way we're helping make the most of what you already own.

INDUSTRIAL GRAPPLE RAKE

Sort sticks, debris, stumps and large logs into piles. Back drag to loosen soil or use as a sieve for leveling ground.

POWER BOX RAKE

Mix vegetation into the soil while loosening and leveling the ground. It's a graded surface prepped for seedlings, if needed.

BRUSHCUTTER

Reduce vegetation, brush and trees with an 80 mm (3 in.) diameter or less into a coarse byproduct.

STUMP GRINDER

Minimize tree stumps and underground roots into a fine byproduct. Its design allows for work in small spaces.

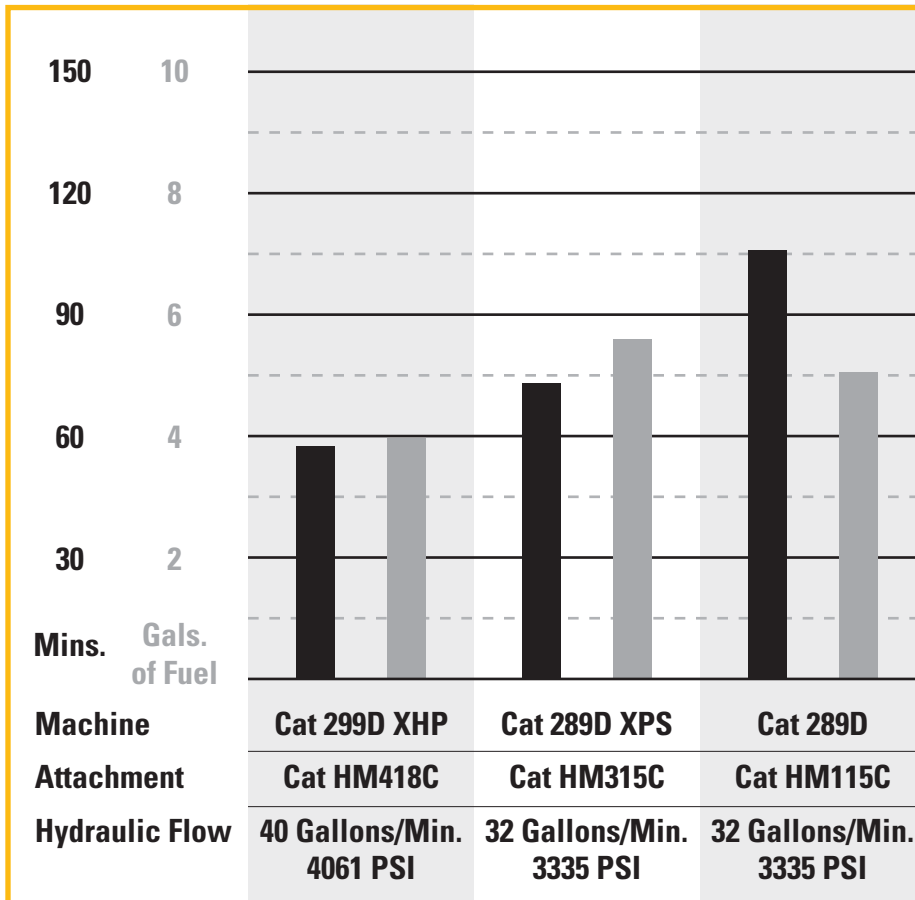

MULCHER TEETH

Select from multiple tooth options depending on the tree species and ground conditions you encounter.

- Standard Carbide
- Chisel
- Rock Resistant
- Right Side Scraper
- Left Side Scraper

COMPARE THE C-SERIES MULCHER TO YOUR REQUIREMENTS.

We challenged the Cat machines paired with Cat attachments to reduce 20 maple trees 200 to 254 millimeters (8 to 10 inches) into fine finished material. Compare which model best fits your requirements of speed vs. fuel consumption.

Machine	Attachment	Flow	Trees / Minute
299D XHP	HM418C	High Flow - XHP	0.377
289D XPS	HM315C	High Flow - XPS	0.266
289D	HM115C	Standard Flow	0.190
